

# Fullerton Ni-Cu-PGE Project

## Northwestern Ontario

FLYROCK

## Project Highlights

- Ni, Cu & PGE property immediately north of the Elmhirst–Castlewood Belt within the Thunder Bay Mining Division.
- 144 contiguous, unpatented, single-cell mining claims, totaling approx. 3,000 ha.
- Completed \$480,000 of assessment work with \$144,000 assessment credit in reserve.
- Systematic soil geochemistry, prospecting, and LiDAR surveys completed in 2024.
- Multiple anomalies, including one sample near the centre of the property returning 18,200ppm Cu and 1,670ppm Ni.
- 35Km West of Geraldton with year-round access.
