

Horwood Au Project

Northeastern Ontario

FLYROCK

Project Highlights

- Early exploration stage Au property in the Porcupine Mining Division.
- 98 single-cell, unpatented claims spread across 5 blocks, including 2 main blocks, totaling 2,013 hectares.
- Situated in the Swayze Greenstone Belt and south of the Destor-Porcupine Deformation Zone. Traversed by the Hardiman Deformation Zone, a secondary, regional-scale splay structure.
- Au, Au-Cu, Zn & Mo occurrences found in & around Horwood Peninsula Pluton at the Project's northern boundary.
