

Wapageisi Au Project

Northwestern Ontario

FLYROCK

Project Highlights

- Exploration stage Au project consisting of 205 unpatented mining claims, totaling 4,313 ha. All in good standing to 2028.
- Largely unexplored except for Kennawapekko Lake occurrence; one hole (1970) which intersected po, py and cpy mineralization.
- Historical exploration near Fringe occurrence outlined several Au-bearing zones with best assay of 7.0g/t (grab sample, 1984).
- Main Katisha Zone returned 1.26g/t Au (grab sample) and 52.80g/t Au over 0.4m (channel sample).
